IFO – Incident Free Operations

Striving to aid companies and personnel to attain incident free operations in the workplace and at home. Improving safety culture on a global scale, one person at a time!

“We realize when to be safe, why to be safe, and we go out of our way to learn how to be safe when we identify the need to go without harm.” We need to be proactive...let us not wait until there is a need...make safety a part of your operations today!

Our goal is to ensure that your project, company and personnel meet and/or exceed regulatory standards/company's HSE expectations and remains working. Our trained, experienced and successful safety professionals, who are backed by a support structure of other experts and specialists, may support many of the following needs:

- Compliance and Regulatory Auditing
- Comprehensive HSE Program Development
- Online Occupational Safety Training
- Loss Prevention Strategies
- Project HSE Support
- Incident Investigations & Corrective Action Planning
- ...countless other HSE needs

WHY WE NEED HSE?

- LEGISLATIVE/REGULATORY
- REDUCTION OF LIABILITY
- STAKEHOLDER ENGAGEMENT
- MORAL/ETHICAL OBLIGATION
- ATTRACTION TO FUTURE CLIENTS

Whether it is sophisticated Technical HSE Consulting support, HSE Management Systems Program Development, Occupational Safety Training, or on-site Project Safety Management Services, AES Marine Consultants has a cost-effective helpful approach for today's employers.

HSE is not just having written policies, it is a Safety Culture!

QHSE Compliance Services

Our firm of domestic and international consultants will act in the best interest of your company or project to reduce and eliminate work related injuries by developing and/or promoting established safe work practices in the office, development, construction, marine, exploration and production energy industries. We realize that safety is the most important factor in an organization, and we will instill that fact into the mindset of your employees, contractors and any personnel working at the facility.

QHSE Program Development

AES strives to assist our clients to develop and implement sustainable Quality Health, Safety and Environmental Programs which adhere to industry guidelines. We can assist in developing formalized QHSE Programs that would adhere to your site-specific or corporate needs to support your overall operational goal, of an incident free operation. Whether you are a multi-billion-dollar corporation with a specific need or small operation with very basic needs, AES Marine can help.

Learning Management System (LMS) Computer Based Training (CBT)

Well trained employees have been shown to be more productive than untrained employees. Effective training should be designed to encourage employee engagement and retention, establish the foundation for a strong safety culture, and provide for a consistent repeatable learning experience for all employees.

AES Marine created the E-Learning Platform to meet the growing need of Informative/Interactive online occupational health, safety and environmental education. Through real-world experience and highly motivated Safety Professionals, we have developed low-cost internet-based education for anyone, anywhere, and at any time.
